

ATEX Grounding Kit

Universal ATEX grounding kit for LW-SS, LW-SS-1" and C mounting bracket

- The ATEX grounding kit is to be used to ensure equipotential bonding if the point of installation has a different electrical potential than the system.

DESCRIPTION

- Can only be used with Procom ATEX antennas.
- The wire and the accompanying parts are made of marine grade stainless steel (AISI 316)
- It's only necessary to install the wire on the LW-SS and LW-SS-1" bracket, when the point of installation has a different electrical potential than the system.
- The ATEX grounding kit can be used for all models of ATEX antennas.
- Instructions on how to install the wire kit, see the ATEX Product Manual.

ORDERING DESIGNATIONS

TYPE NO.	PRODUCT NO.
ATEX Grounding kit	115000100

SPECIFICATIONS

MECHANICAL	
MODEL	ATEX Grounding kit
APPLICATION	To ensure equipotential bonding
MATERIALS	Stainless steel (AISI 316)
PARTS	1x wire, 1x spring washer, 1x M6x8 bolt, 1x thimble and 2x wire lockes. For LW-SS-bracket: 2x M6 washer, 1x M6 nut, For C-bracket: 2x M6 washer, 1x M8 nut.
WIRE LENGTH	2 m
WEIGHT	Approx. 0.15 kg
MOUNTING	See the ATEX Produkt Manual
