

0 dBd Omnidirectional Base Station and Marine Antenna for the 2400 MHz Band

DESCRIPTION

- CXL 2400-1LW/... is a 0 dBd, vertically polarized, omnidirectional base station and marine antenna for the 2400 MHz band.
- The carefully designed, broad-banded antenna element is sealed in a high-quality, glass fibre tube with low wind-load, which will ensure performance undisturbed by corrosive environments.
- To substantially reduce noise caused by atmospherical discharges, all metal parts in the antenna are DC-grounded. Consequently, the antenna shows a DC-short across the coaxial cable.
- Provided with the sturdy "LW" mast mount – a lightweight, multipurpose, epoxy-coated mounting bracket made of non-corrosive aluminium.
- The accompanying U-bolts and fittings are made of stainless steel.
- To be mounted on vertical or horizontal mast tubes, 16 to 54 mm in outer diameter.
- The cable can be led either on the outside or along the inside of the mast tube.
- Large bandwidth with respect to both VSWR and gain.
- Highly suitable for duplex operation with large spacing between the Tx and the Rx frequencies.
- The antenna element is sealed in a high-quality, conical glass fibre tube.
- The CXL 2400-1LW/... is a vibration-proof, lightweight, slim-line, corrosion resistant, modern style base station and marine antenna.
